2. Introduction

DT070ATFT and DT070ATFT-TS is a display module that contains a TFT display with a 480 * 800 RGB resolution. The driver used for this project is the Himax HX8264 + HX8664 or compatible and can display 16.7M colors. The driver is mounted on the glass and the interconnection via FPC including components to drive the display module.

3. General Specifications

Item	Specification	Unit
LCD mode	Transmissive	
Resolution	800(RGB)	Line
Resolution	480	Line
Diagonal Size	7.0	Inch
Overall Size	164.90	mm
Overall Size	100.00	mm
Active area	154.08	mm
Active area	85.92	mm
Optimum Viewing Direction	12 o'clock	
Driver IC	Himax HX8264 + HX8664	
Interface type	RGB 24-bit with TCON	
Colours	16.7M	
Operation temperature range	-20~70	°C
Storage temperature range	-30~80	°C

Remarks:

- (1) Recommended mating connector: Hirose FH19SC-50S-0.5SH, FH12S-50S-0.5SH; or Molex 0512965093, 0512965094; or equivalent
- (2) Color tune may be changed slightly by temperature and driving voltage.
- (3) RoHS compliant.

Component Life Cycle

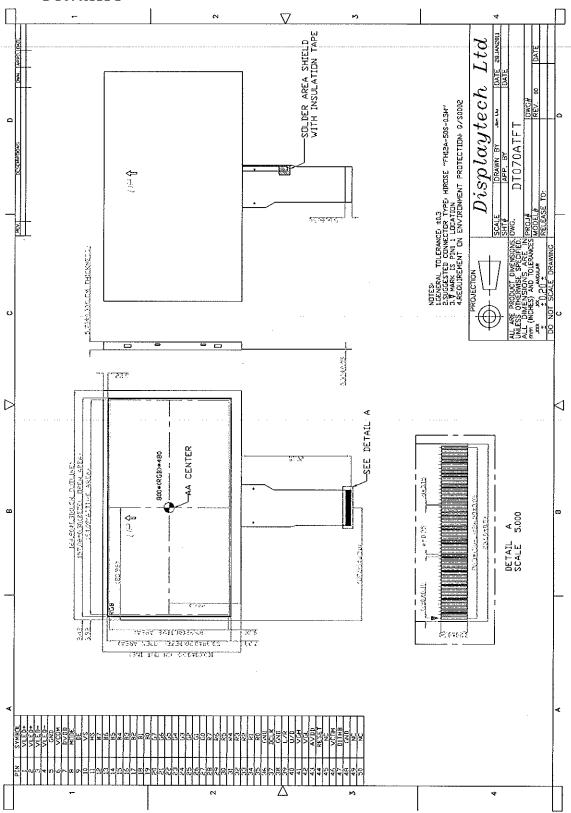

- 1) Storage Life: min. 1 Year
- 2) Operation Life (*1): min. 43 x 10³ h (24hr/day x 7days/week x 52weeks/year x 5years) (Not include backlight)
- 3) Storage and Operation Life Times are defined for a temperature of +25°C

Notes:

- *1. Operation life ends when one of the listed faults occurs:
 - The on/off response-times reach 1.5 times of the max. value specified for a new display
 - The contrast is reduced to 0.5 of the original contrast value
 - Loss of function
 - The number of cosmetic defects exceeds the maximum defined

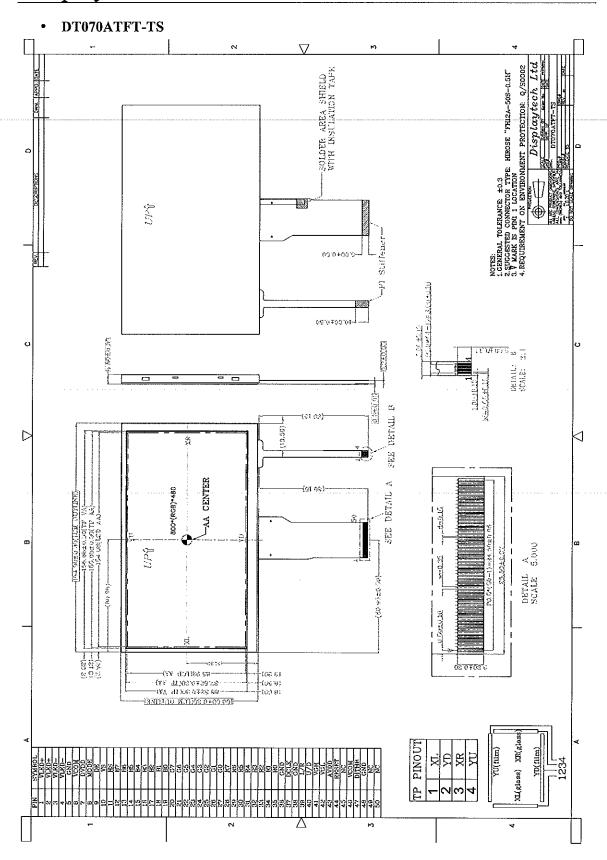

4. Mechanical Drawing

DT070ATFT

Displaytech Ltd LCD MODULE DT070ATFT/DT070ATFT-TS

Version: 1.2

5. Interface Description

Pin no	Symbol	I/O	Description		
1~2	VLED+		Power for LED backlight (anode)		
3~4	VLED-		Power for LED backlight (cathode)		
5	GND		Power ground 0V		
6	VCOM	I	Common voltage input		
7	DVDD		Power for digital circuit		
8	MODE	I	DE/SYNC mode select ("H" = DE mode; "L" = SYNC mode)		
9	DE	I	Data enable signal, active high to enable data		
10	VS	I	Vertical sync input, negative polarity		
11	HS	I	Horizontal sync input, negative polarity		
12	B7	I	Blue data (MSB)		
13~18	B6~B1	Ī	Blue data		
19	B0	I	Blue data (LSB)		
20	G7	I	Green data (MSB)		
21~26	G6~G1	I	Green data		
27	G0	I	Green data (LSB)		
28	R7	I	Red data (MSB)		
29~34	R6~R1	I	Red data		
35	R0	I	Red data (LSB)		
36	GND		Power ground 0V		
37	DCLK	I	Clock for input data		
38	GND		Power ground 0V		
39	L/R	I	Source left or right sequence control		
40	U/D	I	Gate up or down scan control		
41	VGH		Positive power of TFT		
42	VGL		Negative power of TFT		
43	AVDD		Analog power supply		
44	RESET	I	Global reset pin		
45	NC		No connection		
46	VCOM	I	Common voltage input		
47	DITHB	I	Dithering setting. "H" = 6bit resolution, "L" = 8bit resolution		
48	GND		Power ground 0V		
49	NC		No connection		
50	NC		No connection		

Touch Screen Interface (DT070ATFT-TS only)

	Today Sereen Interface (D10/0A11-1-15 Unly)					
Pin no	Symbol	I/O	Description			
1	XL	0	X+ channel output			
2	YD	0	Y+ channel output			
3	XR	0	X- channel output			
4	YU	0	Y- channel output			

6. Absolute Maximum Ratings

(AGND=GND=0V; Ta=25°C)

Item	Symbol	Min.	Max.	Unit
	VCC	-0.5	+ 5.0	V
7)	AVDD	-0,5	13.5	V
Power voltage	VGH	-0.3	+42	V
	VGL	VGH-42	+0.3	V
Operating Temperature	TOP	-20	+70	°C
Storage Temperature	TST	-30	+80	°C

Note:

- When temperature is below 0°C, the response time of liquid crystal (LC) will be slower and the color of panel will be darker.
- If module driving condition exceeds the absolute maximum ratings, permanent damaged may be resulted. If module is driven within the absolute maximum ratings but exceeded the DC characteristics, mal-function may be resulted.
- VDD/VCC > VSS

7. Electrical Characteristics

DC Characteristics

(AGND=GND=0V: Ta=25°C)

Tre		Q11	NA CO	mp.	3.7	l
116	Ш	Symbol	Min.	Тур.	Max.	Unit
Digital supply vo	Itage	VCC		3.3		V
Analog supply vo	ltage	AVDD		10.4		V
Gate On voltage		VGH		16		V
Gate Off voltage		VGL		-7		V
Common electrod	Common electrode driving signal		3.5		4.5	V
Logic supply volt	age	DVDD	(2.8)	3.3	(3.6)	V
Input signal	nput signal Low level		0		0.3xDVDD	
voltage High level		VIH	0.7xDVDD		DVDD	V
Output signal	signal Low level				GND+0.4	V
voltage	High level	VOH	DVDD-0.4			V

8. Power Consumption

(GND=VSS=0V; Ta=25°C)

Item	Symbol	Condition	Тур	Max.	Unit
Digital Supply Current	IDVDD V	DVDD=3.3	3,22	8.70	mA
Analog Supply Current	IAVDD	AVDD=10.4V	15.69	23.01	mA
Gate On Current	IVGH	VGH=16.0V	0.20	0.22	mA
Gate Off Current	IVGL	VGL=-7.0V	0.20	0.22	mA
	Panei & Gamma		177.67	254.65	mW
Power Consumption	Backlight		1.152	1.267	W
	Total		1.330	1.522	W

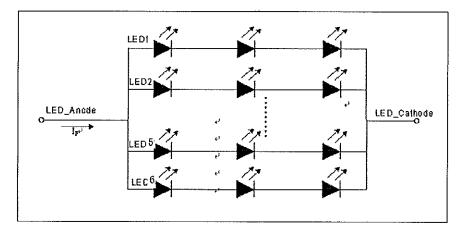

9. Display Controller /Power Supply Timing

See Display Controller Specification: Himax HX8264 + HX8664

10. Backlight specification

(Vcc=3.3V, Vss=0V, Ta=25°C)

Item	Symbol	Min	Тур	Max	Unit	Note
Supply voltage	Vf		9.6		V	
Forward current	If		20	25	mA	10 7 200-
Backlight power consumption	WBL		1.152	1.267	W	18 LEDs

Notes:

- The LED's driving condition is defined for each LED backlight (3 LEDs in series per line, and 6 lines per module).
- 2) In operation, constant forward current should be supplied, the forward voltage is for reference only.

11. Optical Characteristics

(Vcc=3 3V Vss=0V Ta=25°C)

NTSC Ratio	D .	S			50		%	

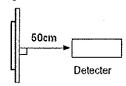

Note 1: The data are measured after LEDs are turned on for 5 minutes. LCM displays full white.

The brightness is the average value of 9 measured spots. Measurement equipment PR-705 (Φ8mm)

Measuring condition:

- Measuring surroundings: Dark room.
- Measuring temperature: Ta=25°C.
- Adjust operating voltage to get optimum contrast at the center of the display.

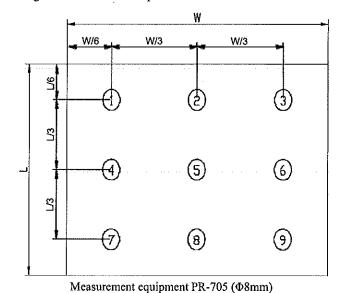

Measured value at the center point of LCD panel after more than 5 minutes while backlight turning on.

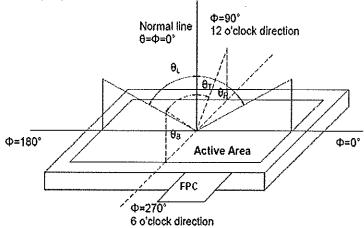

Note 2: The luminance uniformity is calculated by using following formula.

 $L = L \text{ (Min.)} / L \text{ (Max.)} \times 100 \text{ (%)}$

- L (Max.) = Maximum brightness in 9 measured spots
- L (Min.) = Minimum brightness in 9 measured spots.

Note 3: The definition of viewing angle:

Displaytech Ltd LCD MODULE

DT070ATFT / DT070ATFT-TS

Version: 1.2

Note 4: The definition of contrast ratio (Test LCM using PR-705):

Luminance When LCD is at "White" state Contrast Ratio (CR) =

Luminance When LCD is at "Black" state

(Contrast Ratio is measured in optimum common electrode voltage)

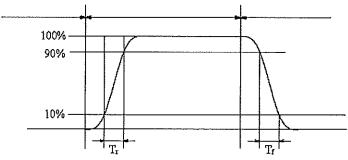

Note 5: Definition of Response time. (Test LCD using DMS501):

The output signals of photo detector are measured when the input signals are changed from "black" to

"white" (falling time) and from "white" to "black" (rising time), respectively.

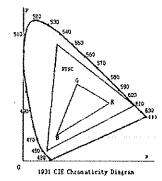

The response time is defined as the time interval between the 10% and 90% of amplitudes. Refer to figure

as below.

The definition of response time

Note 6: Definition of Color of CIE Coordinate and NTSC Ratio.

Color gamut:

$$S = \frac{\text{area of RGB triangle}}{\text{area of NTSC triangle}} \times 100\%$$

Displaytech Ltd LCD MODULE DT070ATFT / DT070ATFT-TS Version: 1.2

12. Safety Precaution

Handling precautions:

This device is susceptible to Electro-Static Discharge (ESD) damage. Observe Anti-Static precautions.

Power supply precautions:

- Identify and, at all times, observe absolute maximum ratings for both logic and LC drivers. Note that
 there is some variance between models.
- Prevent the application of reverse polarity to VCC and GND, however briefly.
- Use a clean power source free from transients. Power up conditions are occasionally "jolting" and may
 exceed the maximum ratings of the modules.
- The VCC power of the module should also supply the power to all devices that may access the display.
 Don't allow the data bus to be driven when the logic supply to the module is turned off.

Operating precautions:

- DO NOT plug or unplug the module when the system is powered up.
- Minimize the cable length between the module and host MPU.
- Operate the module within the limits of the modules temperature specifications.

Mechanical/Environmental precautions:

- Improper soldering is the major cause of module difficulty. Use of flux cleaner is not recommended as they may seep under the elastomeric connection and cause display failure.
- Mount the module so that it is free from torque and mechanical stress.
- Surface of the LCD panel should not be touched or scratched. The display front surface is an easily scratched, plastic polarizer. Avoid contact and clean only when necessary with soft, absorbent cotton dampened with petroleum benzene.
- Always employ anti-static procedure while handling the module.
- Prevent moisture build-up upon the module and observe the environmental constraints for storage temperature and humidity.
- · Do not store in direct sunlight
- If leakage of the liquid crystal material should occur, avoid contact with this material, particularly
 ingestion. If the body or clothing becomes contaminated by the liquid crystal material, wash thoroughly
 with water and soap

DMC Co., Ltd.

Matrix Resistive Touchscreen Reference

1. Product Specifications

1-1. Product Applicable

§ This specification is applied to the generic matrix resistive touchscreen.

1-2. Structure

§ Dimensions, structure, and shape are referred on the drawing attached.

1-3. Environmental Specifications

Specification	Value
Operating Temperature	-20°C to 70°C (no condensation)
Operating Humidity	Less than 90%RH (no condensation)
Storing Temperature	-40°C to 80°C (no condensation)
Storing Humidity	Less than 95%RH (no condensation)
Chemical Resistance (top surface)	Toluene, Tricholoroethylene, Athetone, Alcohol, Gasoline, Machine Oil, Ammonia, Glass Cleaner, Mayonnaise, Ketchup, Wine, Salad Oil, Vinegar, Lipstick, etc.

1-4. Mechanical Characteristics

Specification	Value			
Operating Load	0.5N±0.3N			
Operating Life	Input (finger) 1,000,000 hits			
Light Transmissivity (film/glass)	Over 78% (typical value at full wavelength)			
Top Surface Hardness	Over 2H (by JIS pencil hardness)			

1-5. Electrical Characteristics

Specification	Valu	10		
Maximum Voltage	DC5V			
	Top Electrode	100mA		
Maximum Current	Bottom Electrode	100mA		
	Between the Top and Bottom	0.5mA		
Contact Resistance	Less than 30kΩ			
Insulation Resistance	Neighboring Terminals	Over 100MΩ at 25V		
msulation resistance	Active Area Electrodes	Over 100MΩ at 25V		
Chattering	Less than 10msec at ON/OFF.			

1-6. Appearance

§ Scratch, dust (W = width, L = length, D = average diameter = (longest + shortest) /2)

Item	Size (mm)	Length (mm)	Acceptable Numbers	
	0.1≥W>0.08	4≥L	1pcs in ¢30mm	
Scratch	0.08≥W>0.05	6≥L	2pcs in ¢20mm	
Sciaton	0.05≥W>0.03	10≥L	2pcs in ¢20mm	
Γ	0.03≥W	20≥L	Acceptable	
Dust	0.1≥W>0.05	5≥L	2pcs in ¢30mm	
(Linear)	0.05≥W	Acceptable	Acceptable	
Dust	0.3≥D	2pcs in φ30mm		
(Circular)	0.2≥	Acceptable		

Applied only in the Active Area. Scratches or dusts in the outside of the Active Area are acceptable unless the electrical characteristics are affected.

§ Dirt

Acceptable if not noticeable on a black mat.

§ Tip, crack (t = glass thickness) (applicable only for the glass)

ltem	Size (mm)			Acceptable Numbers
Corner	X Y Y	X	3	
		Υ	3	2pcs /panel
		Z	t	
Side	X X X X X X X X X X X X X X X X X X X	Х	5	
		Y	3	2pcs /side
	2	Z	t	
Crack		//		Opcs (acceptable)

Applied only in the Active Area. Scratches or dusts in the outside of the Active Area are acceptable unless the electrical characteristics are affected.

2. Testing Regulation

2-1. Testing Regulation

- § If the regulation is not specified, the test is performed under the supplier's regulation.
- § Tests are performed under the room temperature unless specified. The room temperature is referred as follows:

Temperature: 20°C±5°C Humidity: 65%±10%RH

2-2. Environmental Specifications

§ Chemical Resistance Test

Condition: Tested after leaving the chemical on the surface for 12 hours being wiped off by cloth.

Judgement: Must be no effect in appearance.

2-3. Mechanical Characteristics

§ Operating Load Test

Condition: Measured by depressing the point between

the dots to the conduction by the testing rod.

Must satisfy the specification. Judgement:

Silicon Rubber (Hardness: 60°) Tip: R = 4.0

§ Operating Life Test

Condition: DC5V Voltage:

300g Load: Cycle:

2 hits/sec

Judgement: Must satisfy the following:

Operating Load:

Within ±50% of the specification. Contact Resistance: Must satisfy the specification.

Insulation Resistance: Must satisfy the specification.

Appearance: Must satisfy the specification.

2-4. Electrical Characteristics

§ Contact Resistance Test

Condition: Top and bottom electrodes are measured at the terminal.

Judgement: Must satisfy the specification.

§ Insulation Resistance Test

Neighboring Terminals: Measured by applying the reference voltage to the terminals

Active Area Electrodes: Measured by applying the reference voltage to the top and bottom electrodes.

Judgement: Must satisfy the specification.

2-5. Appearance

§ Appearance Test

Tested by an examiner with over 1.0 eyesight at 30cm away from the product under the Condition:

transmittable light at over 60° the surface of the product.

Judgement: Must satisfy the specification.

3. Reliability Condition

3-1. Temperature Condition

§ Temperature Condition Test

Following test are performed in the condition with no dew condensation:

Cold Test: Tested after leaving the parts in -30°C±3°C for 240 hours and in the room temperature

for 2 hours.

Heat Test: Tested after leaving the parts in 80°C±3°C for 240 hours and in the room temperature for

2 hours.

Humidity Test: Tested after leaving the parts in the temperature 60°C±3°C, humidity 90 to 95% for 240

hours and in the room temperature for 2 hours.

Cycle Test: Tested after 5 cycles of leaving the parts in the temperature -30°C±3°C for 1 hour and in

the room temperature for 0.5 hours, then leaving the parts in the temperature 70°C±3°C

for 1 hour and in the room temperature for 0.5 hours.

Judgement: Must satisfy the following:

Operating Load: Within ±50% of the specification.

Contact Resistance: Must satisfy the specification.

Insulation Resistance: Must satisfy the specification.

Appearance: Must satisfy the specification.

4. Handling Notes

4-1. Precautions

§ This product is intended for use in standard applications (computers, office automation, and other office equipment, industrial, communications, and measurement equipment, personal and household devices, etc.) Please avoid using this product for special applications where failure or abnormal operation may directly affect human lives, or cause physical injury or property damage, or where extremely high levels of reliability are required (such as aerospace systems, vehicle operating control, atomic energy controls, medical devices for life support, etc.).

4-2. Handling Notes

- § Do not depress or scratch the product with any object with a sharp edge or end.
- § Do not forcibly bend or fold the product.
- § When the product is stored, make sure it is packed in a packing box and stored in a storage temperature range, eliminating any outside load.
- § Do not use or store the product under a condition where the product will be exposed to water, organic solution or acid.
- § Do not use the product under the direct sunlight.
- § Do not disassemble the product.
- § When you handle the product, Hold the product by its body. Do not hold by the tail.
- § Clean the product with a soft cloth or a soft cloth with neutral detergent or alcohol. When contaminated by chemicals, wipe them off immediately with caution not to cause injury to human body.
- § The edge of the glass is not rounded and may cause injury.

4-3. Construction Notes

- § The environmental specifications, mechanical characteristics, and electrical characteristics are only applied to the Active Area.
- § Do not use the touchscreen when the condensation occurs. The condensation inside of the touchscreen is a natural phenomenon and should disappear after the touchscreen is warmed up.

4-4. Electrical & Software Notice

§ There is a contact resistance between the top and bottom electrodes and it changes by the pressure of a finger or a pen. The data must be read after the contact resistance becomes stabilized.

Bezęl

4-5. Mounting Notes

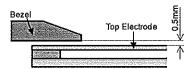

§ Bezel Edge

Bezel edge must be positioned in the area between the Active Area and the Viewing Area. The bezel may press the touchscreen and cause input if the edge enters the Active Area.

Active Area Viewing Area

§ Gap between the Bezel and Touchscreen

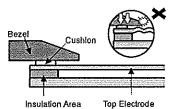

A gap of approximately 0.5mm is needed between the bezel and the top electrode. It may cause unexpected input if the gap is too narrow.

§ Cushion

If a cushion is used between the bezel and the top electrode, the cushion must be free enough to absorb the expansion and contraction difference between the bezel and the top electrode. If the cushion is squashed too hard, the expansion and the contraction difference may cause the distortion to the top electrode.

The cushion must be positioned within the insulation area.

§ Tolerance

There is a tolerance of 0.2 to 0.3mm for the dimensions of the touchscreen and the tail. A gap must be made to absorb the tolerance in the case and the connector.

The tail must not be forcibly stressed or bent too hard to avoid the conduction in the insulated area and wire breaking.

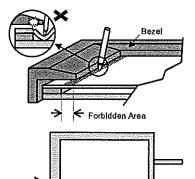

Touchscreen must be held from the bottom such as the structure gluing the touchscreen onto the display. If the touchscreen is glued to the bezel, the adhesion between the top and bottom electrode is stressed and may come off.

O.2 - 0.3mm Case Case Display

§ Forbidden Area

The area within 2mm from the insulation area is structurally week for the pressure, espcially for pen use. The film may be forcibly bent and may cause defection. This area must be protected by the bezel and input must be avoided.

§ Air Vent

Most of the touchscreens have the air vent to equalize the inside air pressure to the outside one. The air vent must be open and liquid contact must be avoided as the liquid may be absorbed if the Iquid is accumilated near the air vent. The top electlode must not be swelled by the air pressure from inside of the case.

5. Warranty

5-1. Warranty Period

- § The warranty period is limited to 1 year from the date of shipping. The warranty for the initial defection such as appearance defection is limited to 1 month.
- § Any defected parts under proper use will be examined by the supplier and replaced by the new parts if the defection is considered to be caused by the supplier.
- § The replacement is subject to be included in the next lot.

5-2. Warranty Target

- § The warranty only covers the product itself and does not cover any damage to others caused by using this product. Onsite repair or replacement is not supported.
- § We will do our best for delivery problem and product defections, but the warranty for the production line is not covered.
- § Resistive touchscreens are structurally not repairable. All defections are subject to replacement.

5-3. Warranty Exceptions

Following conditions are not covered with the warranty and subject to charge.

- § Any malfunctions and damages during transportation and transfer by the user.
- § Any malfunctions and damages caused by a natural disaster or a fire.
- § Any malfunctions and damages caused by static electricity
- § Any malfunctions and damages caused by the failure of the associated equipment.
- § If the product is remodeled, disassembled or repaired by the user.
- § If the product is glued onto the equipment and uninstalled.
- § Any malfunctions and damages caused by an improper usage and handling against the specifications and notes.

5-4. Tools

- § To maintain the quality, the printing screens and the die-cut plates are generally limited to use up to 1 year. Reorders after 1 year from the initial order or from the last renewal are subject to the tooling charge for replacing the printing screens and the die-cut plates. Reorders for the discontinued standard parts are also subject to tooling charge.
- § All the tools, such as CAD data (except for the drawing for approval), block copies (films), printing screens, and die-cut plates are not to be provided for administrative purpose.

5-5. Changes

- § Because of the manufacturing process, changing the dimensions, circuit pattern, and the tail position requires replacing most of the tools and is subject to high tooling charge. Please be careful when ordering and approving the drawing.
- § Circuit pattern and the materials that does not affect the environmental, electrical, and mechanical characteristics such as film, glass, ink and glue are subject to change for the supplier's reason or for improvement within the specifications.
- § Standard products are subject to change for improvement without notice.
