

TEST REPORT Environmental Testing					
Test Fc: "Vibration (sinusoidal)"					
Report reference no:	U2243-22a-18				
Simulation carried out by:	B. Belegu				
Approved by management:	D. Vonarburg, Technical Manager				
Date of issue:	25 May 2018				
Number of pages:	4 pages				
Testing laboratory:	QUINEL AG				
Address:	Elsihof 3, CH-6035 Perlen T Service disse de sessi Servizio di prova in Svizzera				
Testing location:	QUINEL Bern STS 0037 S Swiss testing service				
Applicant's name:	Toradex AG, Mr Diego Petracca				
Address:	Altsagenstrasse 5, CH-6048 Horw				
Manufacturer:	Toradex AG				
Address:	Altsagenstrasse 5, CH-6048 Horw				
Test Report Form originator:	QUINEL (Copyright reserved to QUINEL)				
Test specimen description:	Computer Modules and Carrier Boards				
Trademark:	Toradex AG				
Model and/or type reference:	Apalis TK1 2GB mounted on Ixora with the Apalis Heatsink Colibri T30 1GB IT mounted on Viola Plus with screws Colibri T30 1GB IT mounted on Iris with Colibri Fasteners Colibri iMX6ULL 512MB WB IT mounted on Viola Plus with screws Colibri iMX6DL 512MB IT mounted on Iris with no additional fastening Colibri iMX6DL 512MB IT mounted on Iris with Colibri Fasteners Colibri iMX6DL 512MB IT mounted on Iris with Colibri Fasteners Colibri iMX6DL 512MB IT mounted on Viola Plus with screws Apalis iMX6Q 1GB mounted on Ixora with the Apalis Heatsink Apalis iMX6D 1GB IT mounted on Ixora with screws Apalis iMX8QM 4GB WB mounted on Ixora with screws				
Rating:	12V/5VDC				
Number of tested specimens:	15 specimens				
Date of receipt of the test specimen(s):	16 May 2018				

В.

Test specification:				
Standards:	EN 60068-2-6:2008			
Test purpose:	Type testing for Swiss and EU legal requirements			
Procedure deviation:	none			
Specimen:	unpacked			
Frequency range:	10Hz55Hz			
Vibration amplitude: (displacement or/and acceleration)	0.54mm (constant amplitude/displacement)			
Peak acceleration (@ 55Hz):	3.2 m/s ²			
Endurance procedure:	by sweeping			
Specimen is operating:	yes			
Duration of endurance:	2 hours / axis			
Sweep rate (exponential):	1 octave per min.			
Axes of vibration:	in all 3 main axes			
Single or multiple control:	single			
Choice of control points:	see photograph / according to customer's specification			
Vibration response investigation:	none			
Test procedure and measurements	S:			
Date of testing:	16 May-24 May 2018			
Details of mounting or supports:	see photographs			
Initial test:				
- visual inspection:	Passed			
 mechanical and electrical measurements: 	All the DUTs have been tested by the customer with the default functional testing (FCT): no issues detected.			
Intermediate measurements:	While the DUTs are exposed to vibrations the devices execute software to detect discontinuities in the edge connector or failures on the module and carrier boards. This is achieved by detecting GPIOs interrupts, network issues, UART communication loopback problems.			
Final test:				
- visual inspection:	Passed			
- comparison initial/final tests:	Several investigations have been carried by the customer to identify effects of the test on the module - carrier board interface: no issues detected.			
	Computer modules have been tested with the default functional testing (FCT): no issues detected.			
Relevant specifications to be met	during/after the test (acceptance criteria):			
The module – carrier board interface is not affected at all from the vibration test. The computer modules have no damage and worked correctly during and after the test (verified by visual inspection and default functional testing FCT).				
Conclusion:	Test Passed			

Test equipment	Manufacturer / Type	QUINEL	Calibration
