1. Affected Product Numbers

End of Life Product			Replacement Product		
Part #	Product Name (Product State)	Estimated Schedule	Part #	Product Name (Product State)	Estimated Schedule
01131100	Carrier Board Accessory Kit V1.1A (Evaluation Product)	Sold-out	01131101	Carrier Board Accessory Kit V1.1B (Evaluation Product)	Q4 2020

3. Description of Changes

The Carrier Board Accessory Kit is an evaluation product only. Toradex doesn't provide any long-term availability guarantee. Its intention is to provide useful cables and adapters to customers to evaluate and develop products using Toradex carrier boards and is not to be used as a volume product.

Change #1: New USB to Serial adapter

- The new adapter is an adapter cable, not just an adapter anymore

Old:

New:

- The new adapter is based on the PL2303GT USB to RS323 bridge controller

Change #2: Change of material/color of various items

- Various items have been supplied by other suppliers with changes to shape, material or color. For example, the Ethernet cable changes from grey color to black color.

4. Customer Impact

Hardware

- The changed USB to Serial adapter isn't a small adapter anymore, but an adapter cable, see change above. This has an impact on the physical usage of the cable.

Software

- The new USB to Serial adapter uses different drivers. The new adapter works out-of-the-box for Windows 10 and Linux kernel 5.5 and higher. For older Linux kernels, please have a look at the installation instructions: <https://developer.toradex.com/products/carrier-board-accessory-kit#0-getting-started>

5. Contact
